Anchor Bolts are embedded in concrete and used to support structural steel columns, light poles, signs, and other similar applications. The vertical bend creates resistance, preventing the bolt from pulling out of the concrete foundation.

**FINISHES:**
- Plain Steel
- Hot Dip Galvanized
- Stainless Steel

**Diameter:**
- ½”
- ⁷⁄₈”
- OTHER ___________

**Length:**
- 8”
- 10”

**Length of threading:** ___________
